IMPORTANT SAFETY INFORMATION - READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

⚠ WARNING - Seizures

Some people (about 1 in 4000) may have seizures or black outs triggered by light flashes, such as while watching TV or playing video games, even if they have never had a seizure before.

Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.

Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

Convulsions

Altered vision

Eye or muscle twitching

Involuntary movements

Loss of awareness

Disorientation

To reduce the likelihood of a seizure when playing video games:

1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

WARNING - Repetitive Motion Injuries

Playing video games can make your muscles, joints or skin hurt after a few hours. Follow these instructions to avoid problems such as Tendonitis, Carpal Tunnel Syndrome or skin irritation:

- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms during or after play, stop playing and see a doctor.

WARNING - Battery Leakage

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not mix used and new batteries (replace all batteries at the same time).
- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.
- Do not leave used batteries in the Game Boy. When the batteries are losing their charge, the power light may become dim, the game sounds may become weak, or the display screen may be blank. When this happens, promptly replace all used batteries with new batteries.
- Do not leave batteries in the Game Boy or accessory for long periods of non-use.
- Do not leave the power switch on after the batteries have lost their charge. When you finish using the Game Boy, always slide the power switch OFF.

Super Mario Bros. 2

Subcon's Story

One night, Mario had a mysterious dream. He dreamed he was climbing a long stairway that led up and up to closed door. When he reached the top and opened the door, he found himself gazing out at a world he had never seen, stretching out to the horizon. Then he heard a voice say, "This is Subcon, the land of dreams. The evil toad, Wart, has used his magic to lay a curse upon the land. Please defeat Wart and free us from his spell. Oh - and remember that Wart hates vegetables. Hurry! We need your help!" And then a bolt of lightning suddenly split the sky, and Mario woke up to find himself on the floor. He had fallen out of bed!

A few days later, Mario and his friends hiked to some nearby mountains for a picnic. Upon reaching their picnic spot, they looked around and found a small cave. When they entered the cave, they were amazed to discover the land Mario had seen in his dream stretching out before them.

Selecting a Character

There are four characters for you to choose from. Their abilities are all different, so choose the one that suits you best.

His skills are the most balanced of the characters.

CHECK!

Each characters' abilities will be displayed below them on the Character Select Screen. They are, from left to right, power, speed and jump. You can use a different character for each section, so choosing the character best suited for each stage will make it easier to clear it.

Luigi

He's got loads of jump ability, but he's rather slow.

Peach

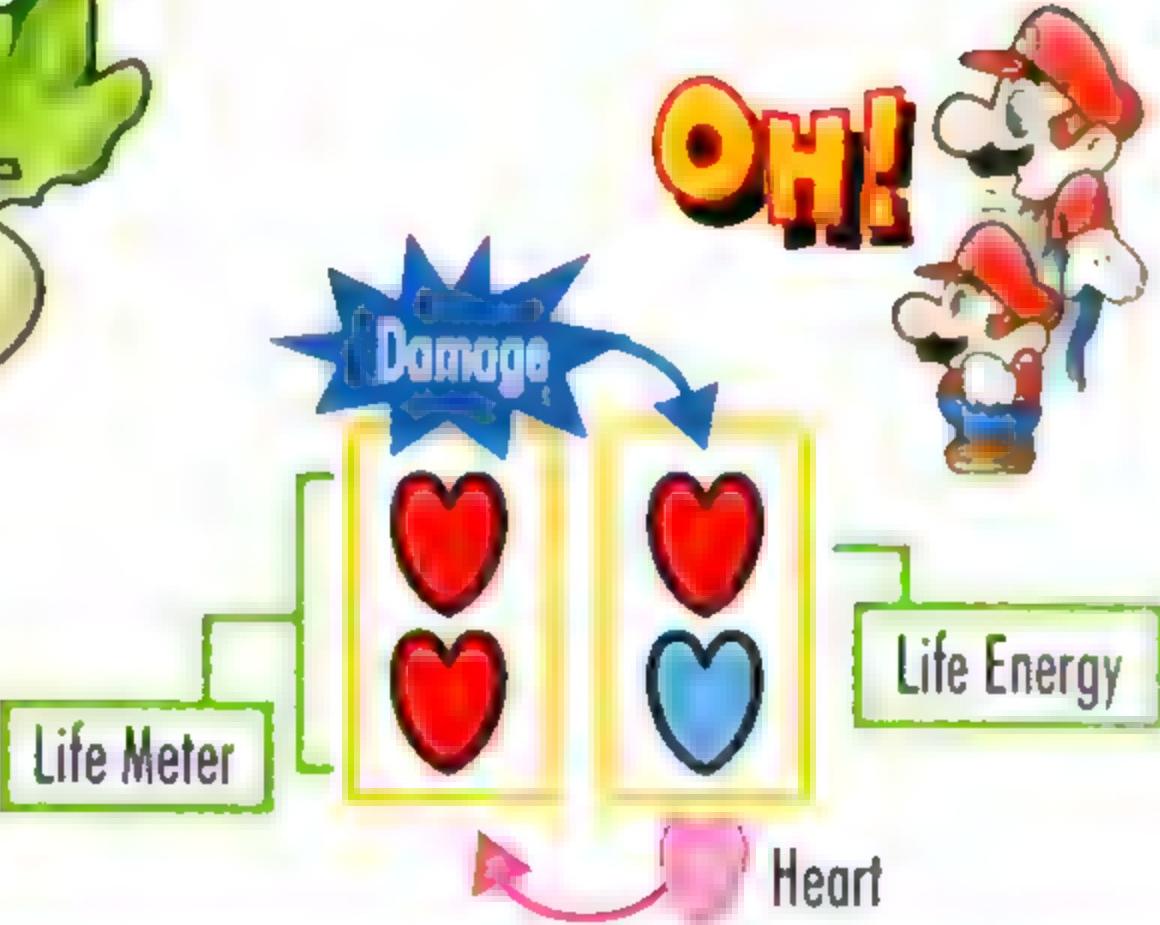

She can float on air for about $1\frac{1}{2}$ seconds when you hold the A Button down.

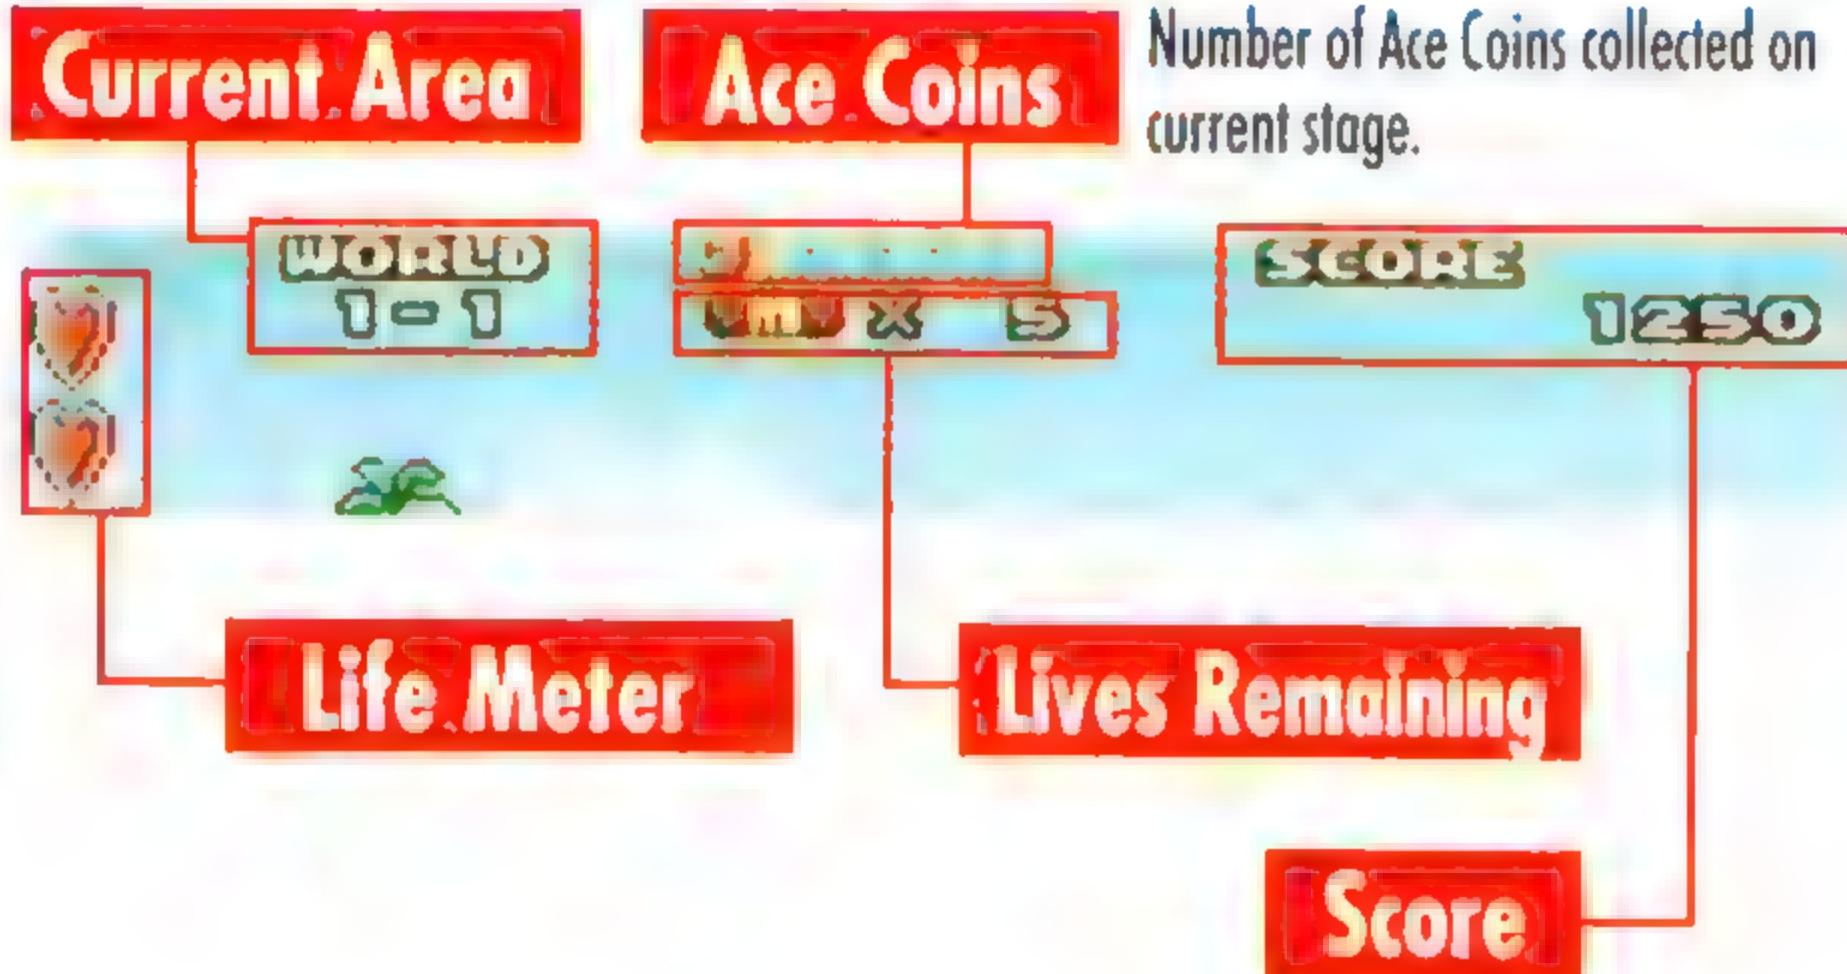

Toad

He has the weakest jump but lots of power.

1 Viewing the Game Screen

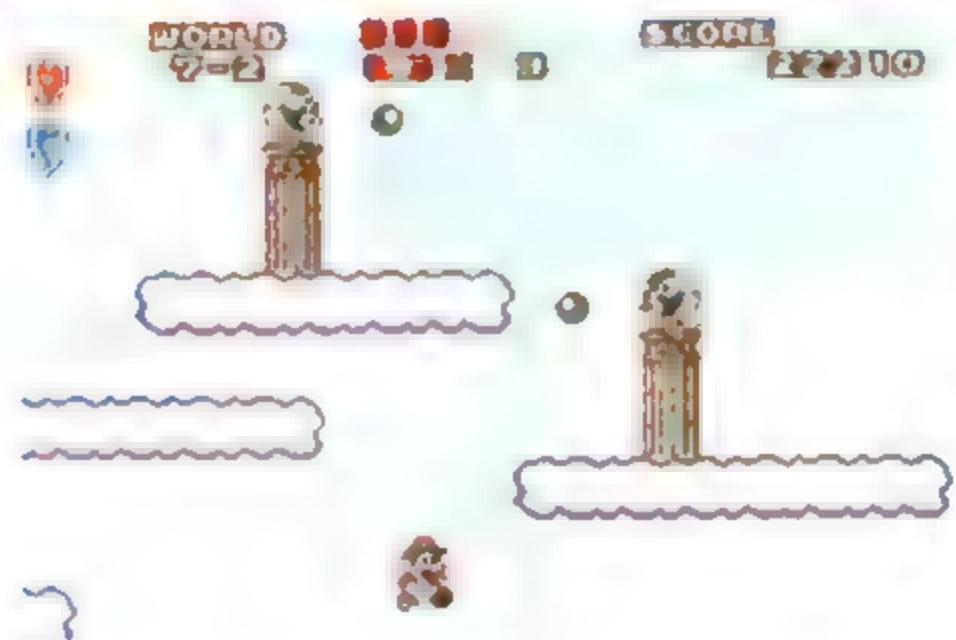

! When your life energy is reduced to one, you will shrink down to normal size.

2 The Life Meter and Life Energy

In Super Mario Bros. 2, you can gain and lose life energy as well as increase your life energy capacity. At the beginning of the game, your Life Meter, which is displayed as a heart or a series of hearts, has a maximum capacity of two, but it's only half full. During game play, your Life Meter can increase to a maximum of five hearts. When you take damage, your life energy will decrease one heart at a time, but your Life Meter's maximum will not decrease.

3

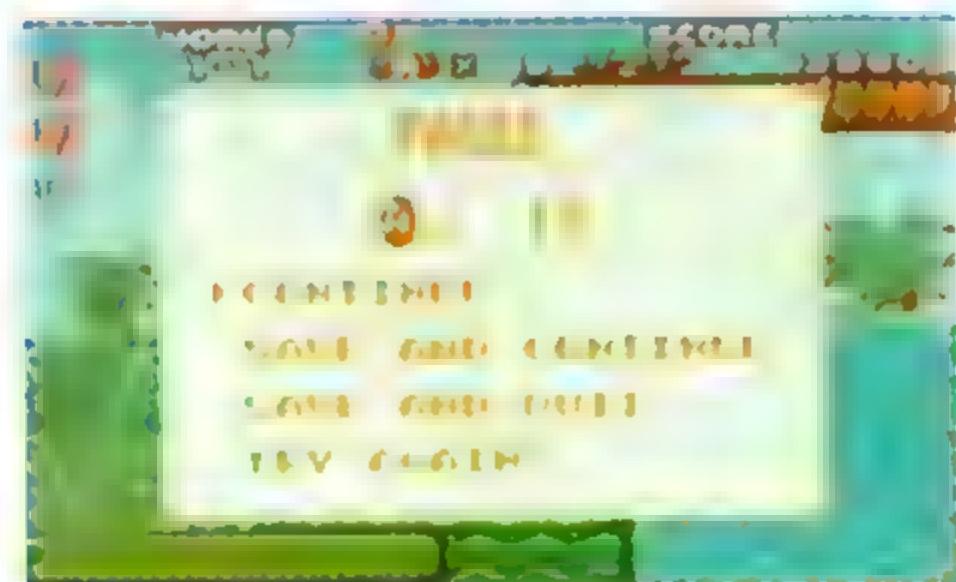

Obstacles

There are holes and waterfalls throughout the game. If you fall into any of them, your life energy will drop to zero. Be careful when moving around or jumping over these obstacles.

4

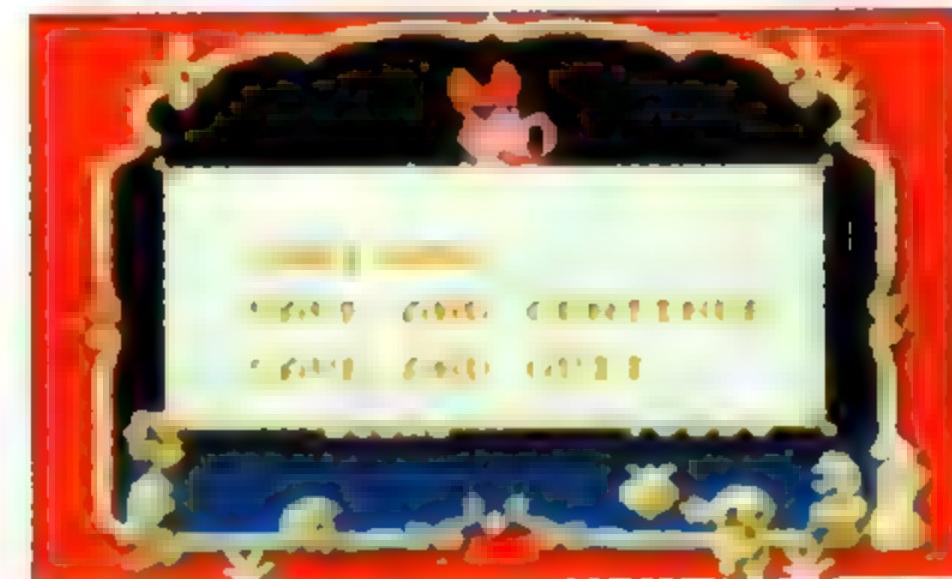

About Saving

When you want to save your progress and continue, or save and quit, press START at any point during game play to display the Pause Menu. Choose the saving option you want and confirm your selection with the A Button.

5

Game Over

You will have five lives at the beginning of the game. When you lose all five, your game will be over. The Pause Menu will then be displayed, and you will have three saving options to choose from.

! If you choose Save and Quit after your game ends, you will start at the beginning of the world where you saved the next time you play.

! If you choose Try Again from the Pause Menu, you will restart the current area from the beginning.

ITEMS

1

Veggies & Other Items

**Vegetables**

Carrots, radishes and more! Pull them out and throw them at your enemies.

**Giant Vegetables**

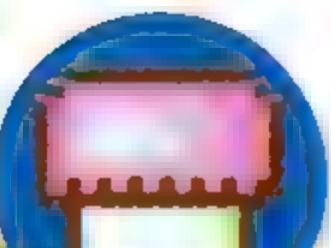

These monsters let you take out multiple enemies in a single throw. But they're so big, it takes time to pull them up.

**Small Vegetables**

These young vegetables may not look like much, but try throwing them anyway.

**Heart Radishes**

Pick one of these helpful vegetables to restore one heart in your life meter.

Mushroom Blocks

Use these as steps to reach high places or throw them at enemies.

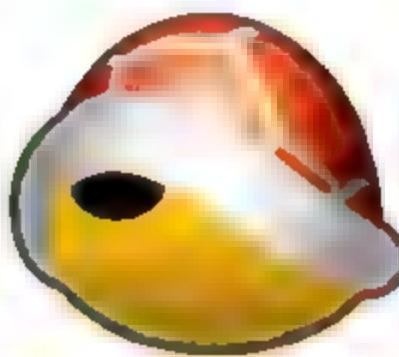

Coins

Collect coins for the Slot Machine. One coin will give you one play.

Bombs

These will begin to flash when you pick them up, then they'll explode a few seconds later.

Shells

Throw these down and they'll slide along taking out all enemies in their paths. Enemies hit with shells will always produce hearts.

POW Blocks

Throw these to the ground to knock out all enemies on screen.

Ace Coins

There are five Ace Coins per area. Collect them all to get a 100%-clear rating.

ITEMS

Mushrooms

These may appear when you enter a warp to Subspace. Pick them up to add extra hearts to your life meter.

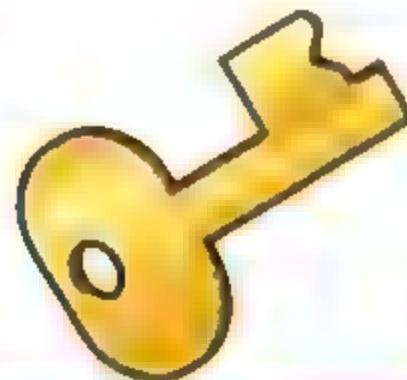

Hearts

Hearts appear when you pick a Heart Radish or vanquish multiple enemies. Grab them to recover life energy.

1-Up Mushrooms

Make sure to grab valuable 1-Up Mushrooms when they appear. They'll give you extra lives.

Keys

You'll need keys to open locked doors. Carrying them will not slow you down.

2

Special Items

Magic Potions

If you pick up a magic potion and toss it down, a door to Subspace will appear. Press ▲ to enter the doorway. In Subspace, the grass you pull up will sometimes produce coins, and depending on where you open the doorway, 1-Up Mushrooms may also appear.

Cherries

When you get five cherries on a level, a Starman will appear. Chase down the Starman to become invincible for a short period of time.

STOP!

Time Stop

When you pick your fifth vegetable, time may momentarily stop and your enemies will become motionless. But watch out—if you run into them, they will still cause you damage.

ENEMIES

Red Shy Guys

If you topple a giant Red Shy Guy, a heart will appear for the taking. There are Shy Guys of different colors, too.

Gray Snifits

Gray Snifits shoot nightmare bullets from their mouths. Keep a look out for Red and Blue Snifits as well.

Red Beezos

Beezos are pesky airborne foes. Study their flight patterns to avoid being hit.

Flurry

You've got to hurry to avoid these ice-skating snow monsters.

Pidgits

These flightless crows are the bearers of bad dreams. They soar through the sky on magic carpets given to them by Wart.

Sparks

You'll find Sparks circling blocks and steps. It's best to use POW blocks to turn off their power.

Phantos

Phantos comes to life when you take the key they're guarding. Beware—Phantos will chase you from screen to screen.

Pansers

These fiery flowers are real hotheads. You'll be safe if you can avoid their fireballs.

Hoopsters

You'll find Hoopsters hanging on vines and ropes. They're real speedsters, so step lively!

Touters

Touters inhabit the waters in the land of dreams. They'll try to block your path near rivers and waterfalls.

Porcupos

These annoying creatures are covered in spines, so jumping on them is not the best solution.

Albatosses

Albatosses were just average residents of Subspace until Wart ordered them to carry Bob-ombs about.

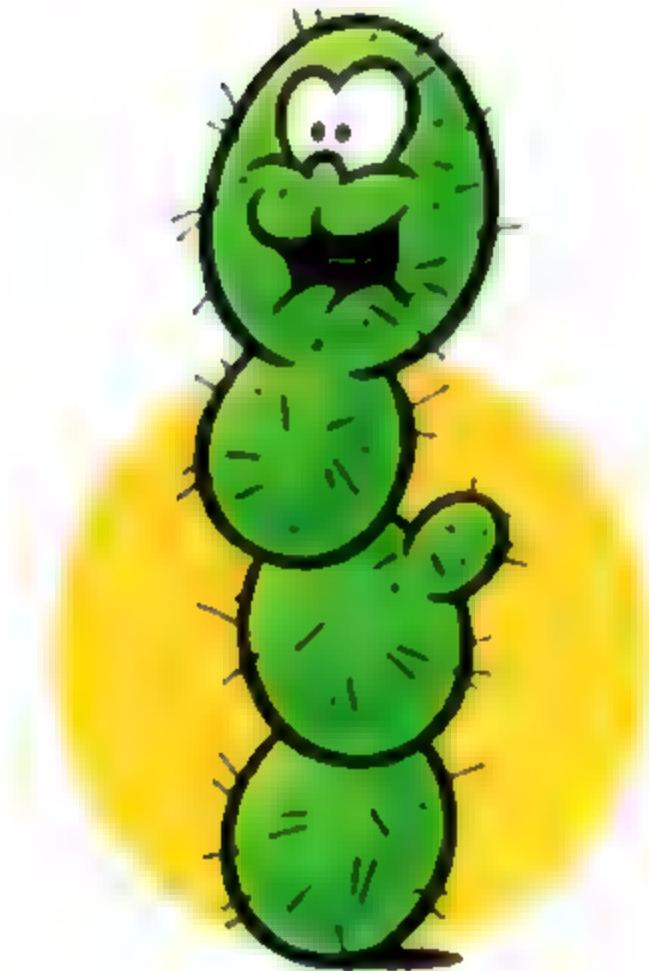

Tweeters

Tweeters hang around with boss characters. They're no friends of yours, so get rid of them quickly.

Cobrats

You'll find Cobrats hidden in jars. When you approach, these troublesome little snakes will pop right out to attack. Think twice when jumping onto jars.

Pokeys

These characters can be quite a thorn in your side. You'll find them in desert areas.

Autobombs

These cannons-on-wheels can be very helpful. Steal them away and use them to cross areas with spiked floors.

Ostros

You've nothing to fear if you can separate Ostros and their riders. Their tremendous speed is something to beware. If you knock them out of action, hearts will appear.

ENEMIES

**Birdo**

Watch out for Birdo's special egg attack. The best way to deal with Birdo is to catch the eggs and toss them right back.

**Fry Guy**

This flaming fiend was brought to life by Wart. When it gets angry, it will attack by hurling fireballs.

**Mouser**

Mouser destroys sweet dreams with his nightmare bombs. He's very proud and doesn't think of himself as an ordinary mouse.

Tryclyde

Once an outsider, Tryclyde was enlisted by Wart because of his evil cunning and triple-strength attack.

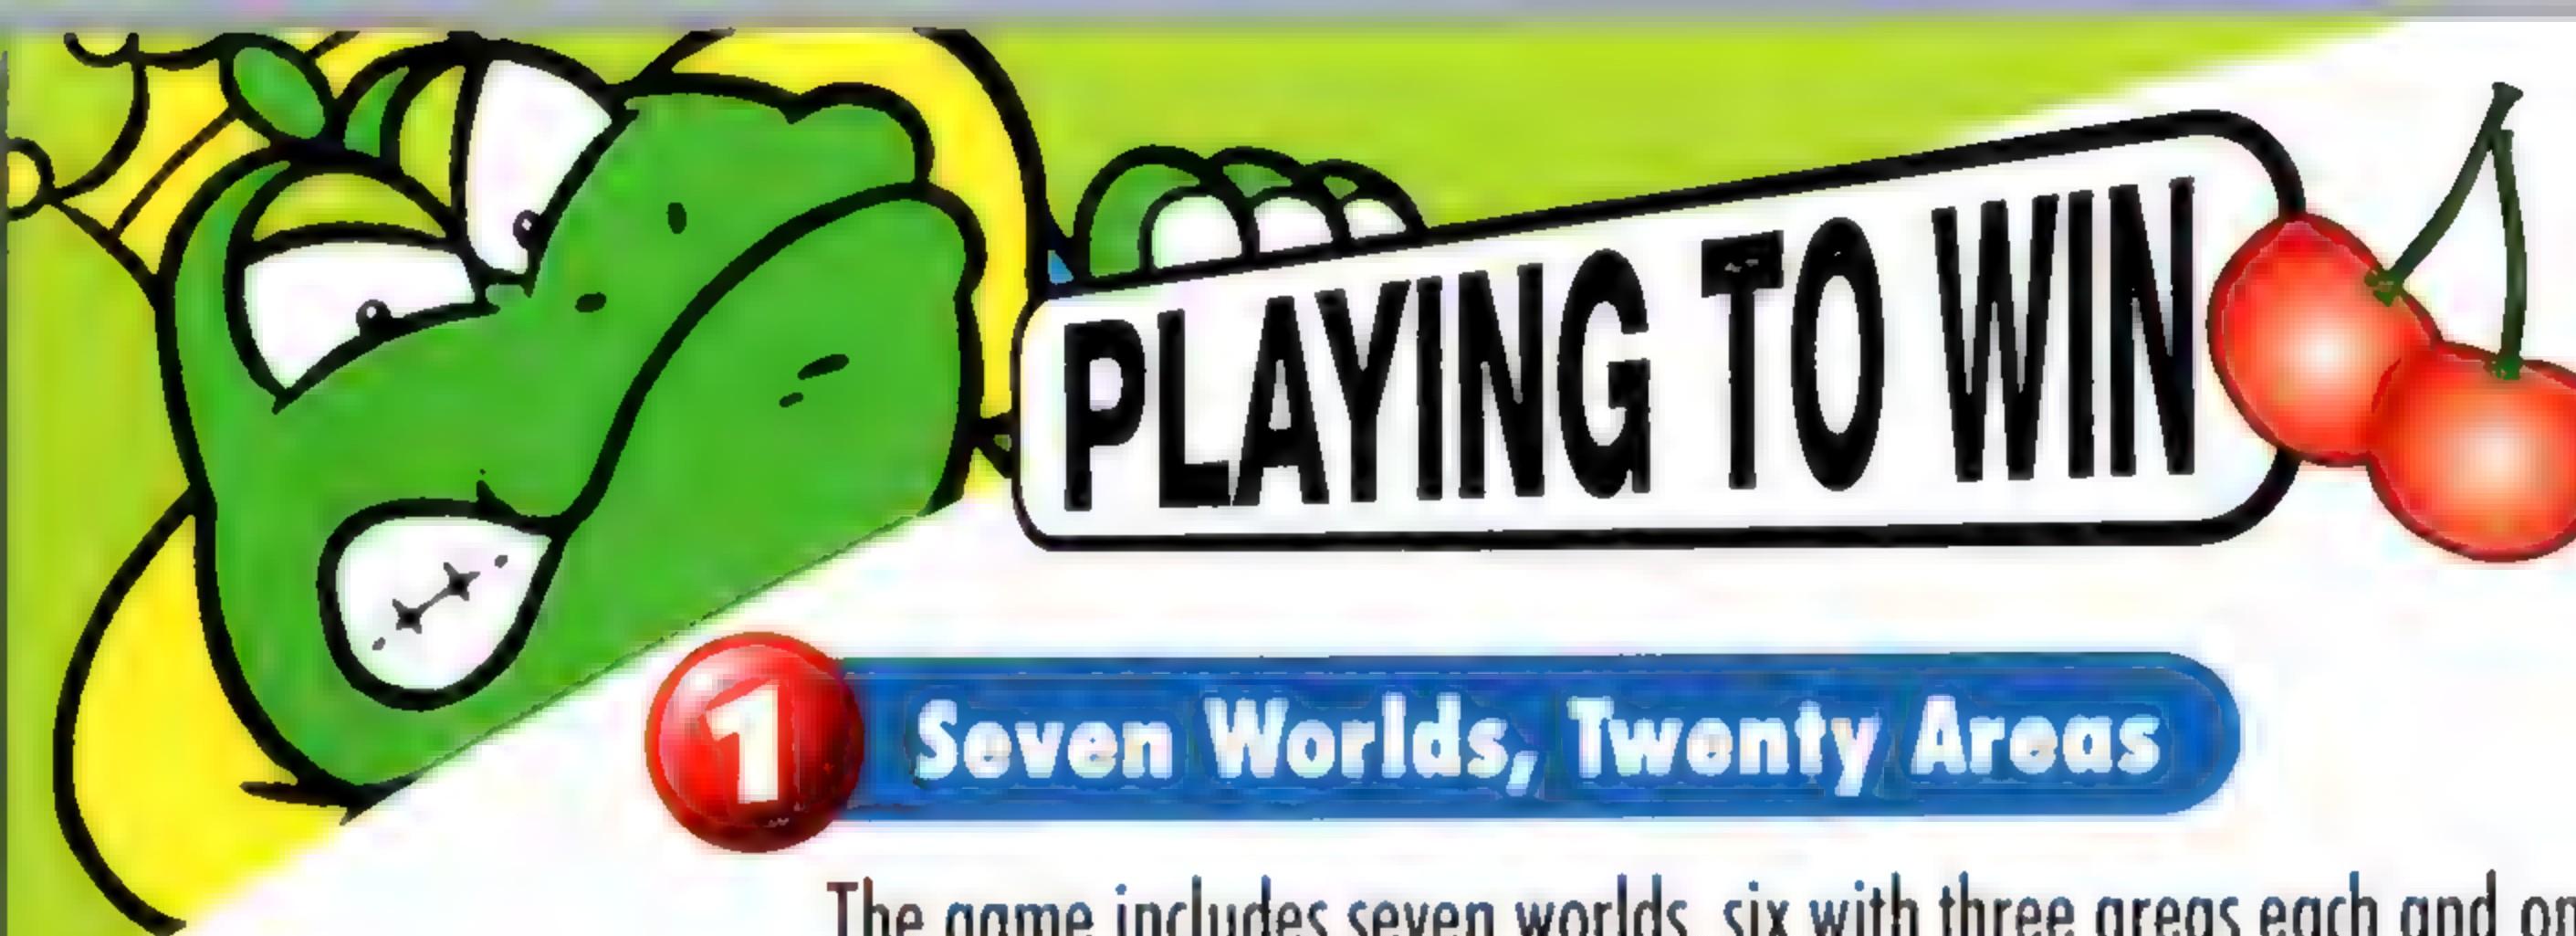

Wart

Wart is the most uncontrollable mischief maker in all of the land of dreams. He uses the Dream Machine to create a myriad of monsters.

Clawgrip

Clawgrip will suddenly grow as it scuttles back and forth. Be careful—it loves to throw rocks, and it has a good arm.

1 Seven Worlds, Twenty Areas

The game includes seven worlds, six with three areas each and one with two areas—a total of twenty areas to explore. There are gates between each area, and you must have the crystal ball to open each gate. Birdo sometimes has the crystal ball, so you must defeat her to get it.

At the end of each area, you'll meet up with a mini-boss, and at the end of each world you'll battle a boss. You'll have to beat them all to reach the end, where you'll test your skills by fighting the biggest baddie of all, Wart.

2

Bonus Chance

After clearing each area, you'll have the chance to win extra lives on the slot machine. The number of coins you collect in each area you complete determines the number of times you can play. Match the pictures on the slot machine to win.

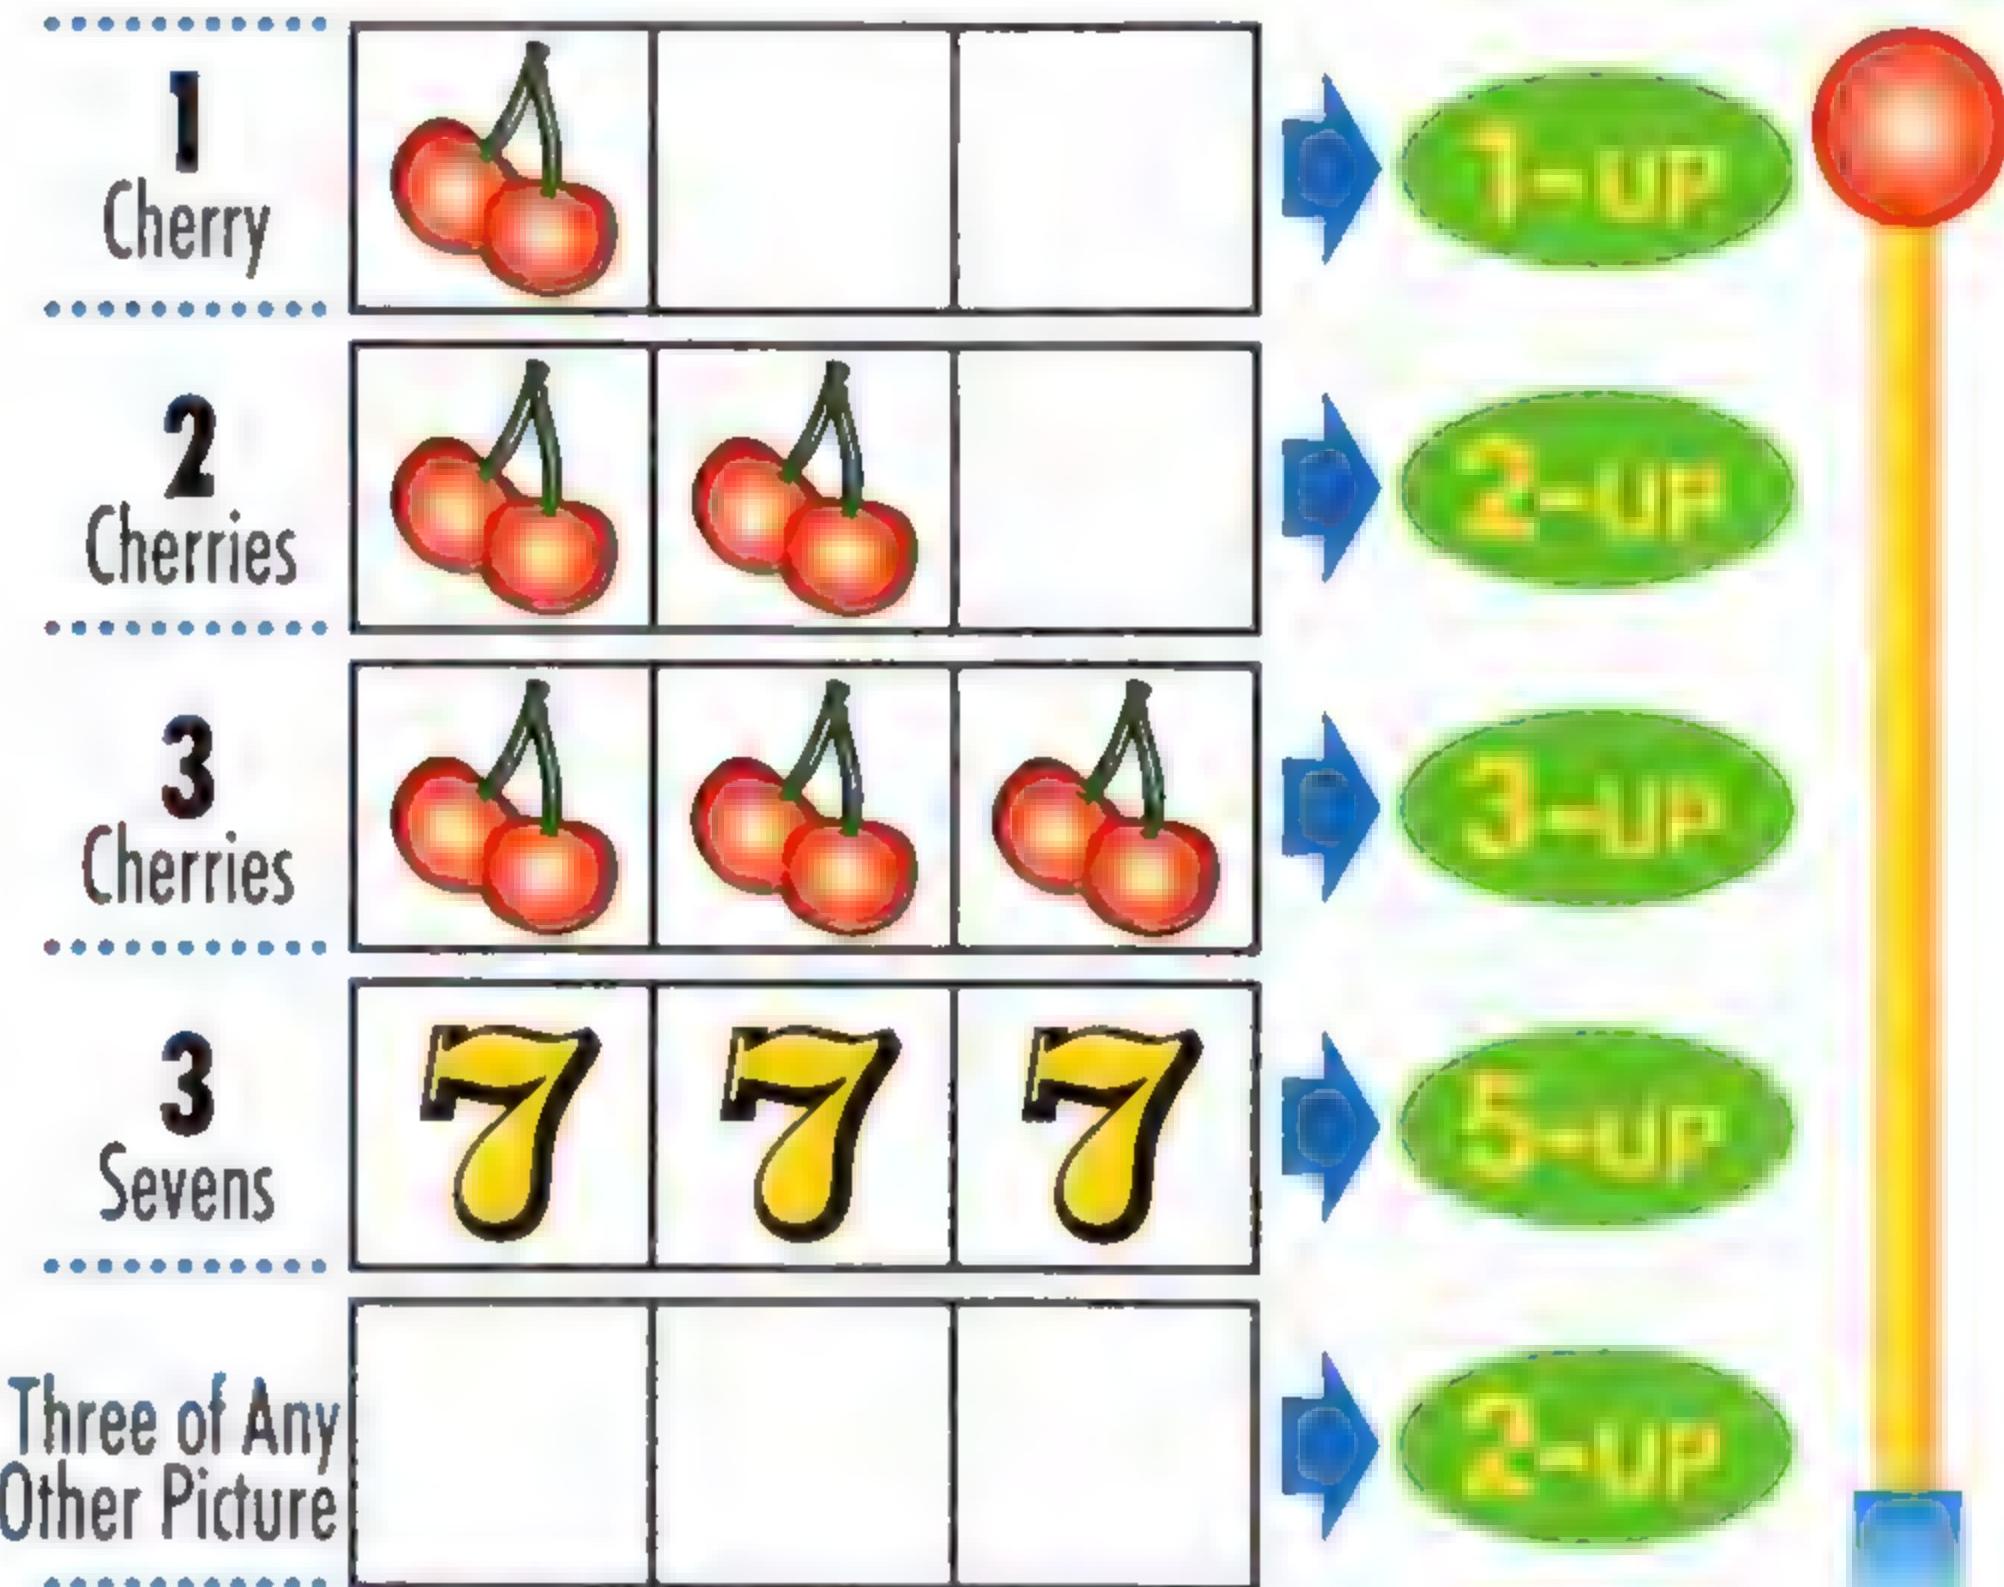

First, you must decide how many coins to wager.

Wager All Coins

Wager One Coin

Reduce Wager by One Coin

Increase Wager by One Coin

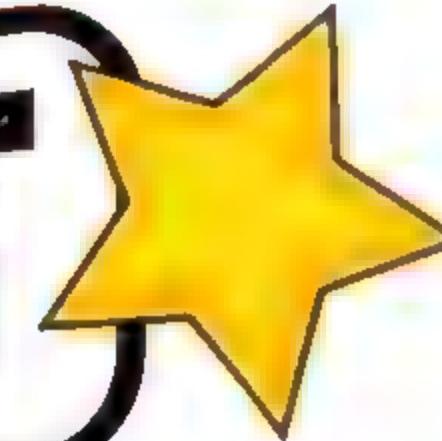

Wager x Picture Value = Number of Bonus Lives
